Towards an MSc in Inclusion Health

- Dr Chris Sargeant
- GP Pathway Plus Team BSUH, Brighton
- Senior Clinical Lecturer at Brighton and Sussex Medical School
- GP Brighton Homeless Healthcare, Morley Street (1998-2008)

London pathway
Healthcare for homeless people

Why do we need an educational package/strategy?

How do/did we learn what we need to know for our type of work?

Various sources-professional training, CPD, experience, talking to others, learning from our mistakes and successes, formal courses e.g. RCGP certificates, training days, PG training e.g. MSc Substance Misuse

Nothing with the defined focus on our area, always slightly to one side of what we need. Services often grow up separately and difficult to influence each other.

London pathway
Healthcare for homeless people

Can we do better?

- Better prepare ourselves and colleagues.
- Widen the benefit of experience.
- Avoid repeating the same mistakes.
- Provide support and reduce burnout.
- Reduce high turnover/improve retention.
- Improve staff and service user satisfaction.
- Use best available resources/evidence.
- Improve services, reduce variability.
- Define and raise the profile of Inclusion Health speciality.

London pathway
Healthcare for homeless people

How can we capture this learning and experience?

Post-graduate education is an opportunity to:

- Reflect on and learn from our experience
- Learn from others
- Put our experiences into context
- Examine and appraise the evidence for what we do
- Explore in depth, areas of interest
- Examine neglected areas
- Undertake research
- Take discoveries back to our services and service users
- Publish
- Define and disseminate best practice

London pathway
Healthcare for homeless people

Postgraduate Education

- Usually based on defined units or modules of study
- Hours of study (taught and self directed) equate to M level credits (200 hours =20 credits)

Postgraduate Awards

Certificate 60 credits

Diploma 120 credits

MSc 180 credits

London pathway
Healthcare for homeless people

Current Certificate Proposal

- Module 1

Introduction to Inclusion Health

History, concepts, developments to date and legal aspects

- Module 2

Health Consequences of Poverty

Including Tri-morbidity, Physical, Mental Health, Social Determinants of Health

- Module 3

Health Care Provision and Improving Working in Inclusion Health

Service development, stress,burnout,interprofessional working

London pathway Healthcare for homeless people

Underlying principles

- Inter-professional learning
- Different disciplines learning together and from each other
- No need for first degree
- Wide range of disciplines from the field
- Part-time to fit in with working lives
- Can be taken for MSc level study (by completing assignment) or for continuing professional development

Various Combinations to Make MSc

- PG Certificate Inclusion Health (60)
- Plus Research Methods Module(20)

Plus

Another Certificate e.g. Education (=IH and Education) or area of interest e.g. IH and Addictions

OR

Optional Modules (e.g. Leadership, Global Health, Commissioning)

Plus Dissertation =MSc Inclusion Health (180)

London pathway Healthcare for homeless people

What do you think?

- Would you take such a course?
- What would you like to see included?
- Outline available to take away
