Global Education and Mobility (GEM) Programmes

Going International, Staying Competitive

NTU is focused on expanding opportunities for its students to become global citizens. We work hand-in-hand with some of the best international partner universities and international organisations to offer student mobility opportunities to learn, work and do research. These help them develop global perspectives besides broadening their learning experience.

NTU also offers students from these partner institutions similar opportunities – a unique Asian adventure in Singapore, a cultural melting pot that blends East and West.
