International Affairs: new perspectives around the world

- **60's and 70's** International activity was deemed important, certainly compared to other universities; however, internationalization was circumscribed to student mobility programs with universities located mainly in the USA

- **80's and 90's** We expanded the scope of the Tecnológico de Monterrey's relations and partnerships with universities, focusing not only on US Universities, but also Canadian and European universities

- The implementation of a formal International Faculty Development Program, aimed at training the Tec's lecturers in student-centered teaching techniques in European and American Universities

- By the beginning of the **21st century**, the Tec's partnerships reached Asia and Oceania
