In the Information Age

WWW opens Internet to all

But digital divide appears

Internet not a silver bullet

IT & diversity: keystones of innovation, growth

IT & diversity: success factors for Information age

Need to leverage talents of all

IT & diversity give an edge

Many kinds of IT jobs

IT jobs are in:

- IT industry
- IT professions
- IT skills

Good jobs require information skills

Global diversity scorecard-Grade?

Apple is the latest technology company to reveal the diversity of its workforce. The company is mostly male, white and Asian.

Massive gender, racial/ethnic gap in IT industry

IT firms tend to hire people who look like they do

What does an engineer look like?

Both are engineers

Mocrracy

Women and minority tech workers dropping out

Women & the leaky pipeline

Recruiters: we can’t find any to hire . . .

BAME in STEM: UEL does it right!

Go BAME women!

High education/low-paid jobs

Women in High Management – too high to see?

Marissa Mayer, CEO, Yahoo

Freeze your eggs, Facebook and Apple say

Want a raise?Trust the system and karma

Female directors up

Few minorities on boards ↓

What is to be done?

What do we ask of business?

What do we ask of business?

Diversity for innovation and growth
